Media Release: Sydney, Australia June 23rd 2009

FRUSTRATED MANAGERS SPARK SAP SOLUTION

Frustrated managers who were reluctant or slow to approve purchase orders because of technological roadblocks have sparked a new SAP software solution.

ExpressPO allows managers to approve orders from their computer or mobile phone in just two clicks.

"A lot of busy managers we talked to said purchase orders became an administrative pain because they had to stop what they were doing and launch SAP or because they had to wait till they were back in the office to do so," said Jack Cornford, Senior Architect at 10 Seconds Software.

"In coming up with ExpressPO we were able to combine a deep knowledge of the complexities of SAP purchase order approvals with a simple intuitive user experience. It monitors purchase orders and simply sends emails to the appropriate manager seeking approval. Manager's can then easily approve orders on any web browser or iPhone, Blackberry or SmartPhone in just two clicks without having to launch SAP," said Jack.

The software is particularly useful for those who are on the road or only have access via their mobile phones for long periods of the day.

"With an installation that takes minutes and no configuration changes to your SAP R/3 system, ExpressPO radically streamlines the purchase order approval process delivering approval requests right into manager's laps." "This is an IT solution that avoids the over-use of IT," said Jack.

ExpressPO key features include:

- Accessibility via your desktop browser, iPhone, Blackberry or smart phone
- Zero SAP configuration required. ExpressPO integrates seamlessly with your SAP system
- ExpressPO can monitor multiple SAP release strategies
- Real-time notification of purchase order approval requests - direct to your inbox
- No requirement for the SAP Workflow module
- Two clicks and your purchase order is approved! It's that simple.
- Supports single sign-on
- Installation takes minutes.

ExpressPR, the sister product that streamlines purchase requisitions approval will be available shortly.
